

IFADAH AULIA MUHTI SINAGA

INFORMATION TECHNOLOGY STUDENT

+62 821-6543-9899 | ifadahauliasinaga@gmail.com | Jl. MS. Sianturi NO.24 Sibolga

SUMMARY

Information Technology graduate with experience in web development, database management, and information systems. Skilled in developing responsive web applications using Laravel, React, PHP, and MySQL, with an interest in data processing and data visualization. Experienced in building dashboards, managing databases, integrating APIs, and developing digital solutions to support organizational and business needs.

ORGANIZATIONAL EXPERIENCE

DPM (Student Representative Council)

Apr 2024 - Dec 2025

- DPM is a student organization that acts as a supervisor of intracampus organizations and also plays a role in accommodating the aspirations of lecturers, staff, and students.

HMPSTI (Student Association of Information Technology)

Mar 2024- Nov 2025

- HMPSTI is a student organization under the Information Technology Program at Brawijaya University. It focuses on developing students' academic, creative, and leadership skills through various tech-related activities and events.

Volunteer Kampung Cempluk

Sep 2024- Oct 2024

- Volunteered at Kampung Cempluk, a cultural community event in Malang, assisting in local performances and community programs.

GDSC (Google Developer Student Clubs)

Oct 2023- Feb 2024

- An organization or association of students who have an interest in informatics. This organization also fosters and guides its members to understand more about informatics by inviting speakers or lecturers from well-known application companies.

PROJECTS

Hr-insight (Data Analytics & Web Development)

Developed a web-based HR analytics dashboard using Laravel and MySQL to manage employee, department, and position data. Implemented data visualization and reporting features to support workforce analysis and decision-making.

Ogek Wali (Information System Development)

Ogek Wali is a web-based public complaint platform for Sibolga City that allows citizens to submit complaints and track their status online. It also provides an admin dashboard for managing reports, categories, follow-ups, and supporting evidence.

FinTrack (Financial Web Application)

Developed a responsive financial tracking application using React, featuring financial dashboards, transaction management, expense tracking, and data visualization to help users monitor their financial activities.

Arus (Data Monitoring & Web Development)

Developed a web-based traffic monitoring platform that presents traffic information for Medan City through an interactive and user-friendly interface, helping users access and understand traffic conditions more efficiently.

Nusantara Catering (Business Web Development)

Developed a responsive catering business website that presents services, menus, and company information through a modern interface designed to improve customer engagement and digital accessibility.
